

SOLO MOVIE 5.1

- Audiophile “5.1 Home Theatre in a Box”
- HD audio decoding
- Bluetooth with aptX™ streaming technology
- High-end audio circuitry and components
- Breathtaking Class G amplification
- Multi-function learning backlit remote
- 4 HDMI inputs

A decade ago, Solo redefined the style and performance of compact Hi-Fi & Movie systems, bringing Arcam’s legendary sound quality into ‘non Hi-Fi’ homes. The new Solo movie 5.1 delivers music and movie sound at a quality level previously only possible from large separate components.

Featuring a BD/DVD/SACD/CD drive and 250W of amplification in a stylish, low-resonance enclosure, the Solo movie provides high-quality room-filling sound. Four HDMI™(1.4b), coax, optical, phono and 3.5mm line inputs allow for flexible system building without being over complex. Audio can also be streamed to the movie via Bluetooth and also UPnP network either wired or wirelessly. Finally an FM/DAB/DAB+ tuner is available. On board decoding of all current HD audio formats ensure that absolutely no sonic detail is lost. The movie 5.1 is supplied with a multi-page learning backlit remote control.

The Solo movie 5.1 is available now at your Arcam dealer.

Amplifier

5 x 60W (all channels driven 8Ω)

5 x 75W (all channels driven 4Ω)
